

# RETHINK . RECYCLE!

*Use Pure Energy! Preserve Environment/ Nature/ Mankind!*

PURE ENERGY, a division of Grow Green India (GGI) is a truly professional turnkey consulting organisation set up by a professional entrepreneur with the objective to provide high quality, value driven environmental services to commercial, industrial, private, governmental and non-governmental sectors. A company dedicated to "Rethink. Recycle" and "ENVIRONMENT AROUND" it is a specialist company in the field of Water & Waste Treatment Technology. The Company follows Public Private Partnership (PPP) model to provide Safe Drinking Water to the Urban & Rural Underserved, through setting Community Water Purification Systems and recycling the wastes.

## ***Vision:***

Improving water quality to enhance quality of life through sustainable technologies and services and to establish Pure Energy in the World Market as a trusted and most preferred solution provider across all the sectors we service.

## ***Mission:***

Our Mission is 360° Rethink. Recycle. We always strive to keep the AIR we breathe and the water we drink as PURE as nature.

## PRODUCT SHOWCASE

### ***Water Treatment Plant:***

Reverse Osmosis Plant - Arsenic Removal Plant • Fluoride Removal Plant • Iron Removal Plant  
• Water Softening Plant • De-Mineralization Plant • SoftnerPlant • Clarifiers • Settlers

## ***Water Treatment Gallery:***

We at PURE ENERGY always focus new concept for Government. We offer innovative idea for Government project Like:

- Disaster Management (Mobile Water Treatment Plant)
- Iron Removal Plant for Hand pump
- UF Technology Water filter • Electro Chlorinator
- Arsenic & Fluoride Water Filter
- Big Iron Removal Plant for a Village.

## ***Sewage Treatment Plant:***

We hold expertise in meeting the demands of conventional Sewage Treatment Plants. These are precision designed using the skills of our product designers and construction staff backed by a well equipped manufacturing facility, we are able to carry out various activities in an efficient manner. Our process expertise also allows us to deliver in these customized changes as demanded by our customers.

- Institutional Sewage Treatment Plant
- Municipal Sewage Treatment Plants
- Extended Aeration Sewage Treatment Plant
- Industrial Sewage Treatment Plants
- Pre Fabricated Sewage Treatment Plant
- Activated Sludge Process Sewage Treatment Plant
- Package Sewage Treatment Plant

## ***Effluent Treatment Plant:***

Offering a wide variety of Effluent Treatment Plan.

- Effluent Treatment Plant For Automobile Industry
- Packaged Effluent Treatment Plant
- Effluent Treatment Plant For Food And Beverages
- Industrial Effluent Treatment Plant
- Effluent Treatment Plant For Pharmaceuticals
- Effluent Treatment Plant For Sugar Industry
- Effluent Treatment Plant For Electroplating
- Effluent Treatment Plant For Leather Industry

## ***Bio gas***

Biogas is mainly methane and carbon dioxide. Pure Energy prefabricats compact Biogas plant , converting manure, sewage sludge, municipal solid waste, biodegradable waste or any other biodegradable feedstock waste onto biogas which can be used as the fuel for cooking.

The product lines include compact small plants as well as plants developed individually according to customer requirements, which are set up conventionally or delivered as modular systems. Customer-specific solutions can be tested in our own technology centre or in pilot plants. We can act regularly as partners in national and international research projects for the development of future-oriented technologies.

## ***Operation And Maintenance***

- Operation and maintenance of Water Treatment Plants
- Sewage Treatment Plants,
- Industrial Effluent Treatment Plants and
- Waste Water Re-cycle Plants
- Water Softening Plants
- Oxide and Iron Removal
- Reverse Osmosis Plants of all capacities.

## ***Execution***

- On total turnkey basis from concept to completion including Design and Construction
- Execution of swimming pools • Water treatment plants
- Effluent treatment plants • Sewage treatment plants • Waste water re-cycle plants

## ***Why Us?***

Our Water and Waste Water Treatment Plants are the best choice of our customers across the Globe because of number of factors, which is as follow:

- Make the most of every drop • Maximum Life, Minimum expense
- Create the enviornment of water abundance
- Precision in water engineering
- Infrastructure, Experienced & Expert team

*“With a strong commitment to research and successful completion of large-scale water projects, PURE ENERGY is uniquely positioned to deliver real and lasting process improvements for a broad range of industries and applications. From energy exploration to agriculture, manufacturing to mining, our innovative technologies provide the potential to recycle billions of gallons of wastewater each year while safeguarding our nation's clean energy reserves. And for many industries, such as mining operations focused on hard, precious, and strategic metals, our technologies not only protect the environment – they can increase yields.*

*In the world's developed countries, we take it for granted that clean water flows freely through an established infrastructure into our homes, schools, offices and manufacturing plants, and across our farmlands. While we have instant access to this life-sustaining substance, millions of others do not. We will continue on our mission, encouraged by the world's growing awareness of the need to solve these pressing challenges of access to and preservation of our water resources”.*
